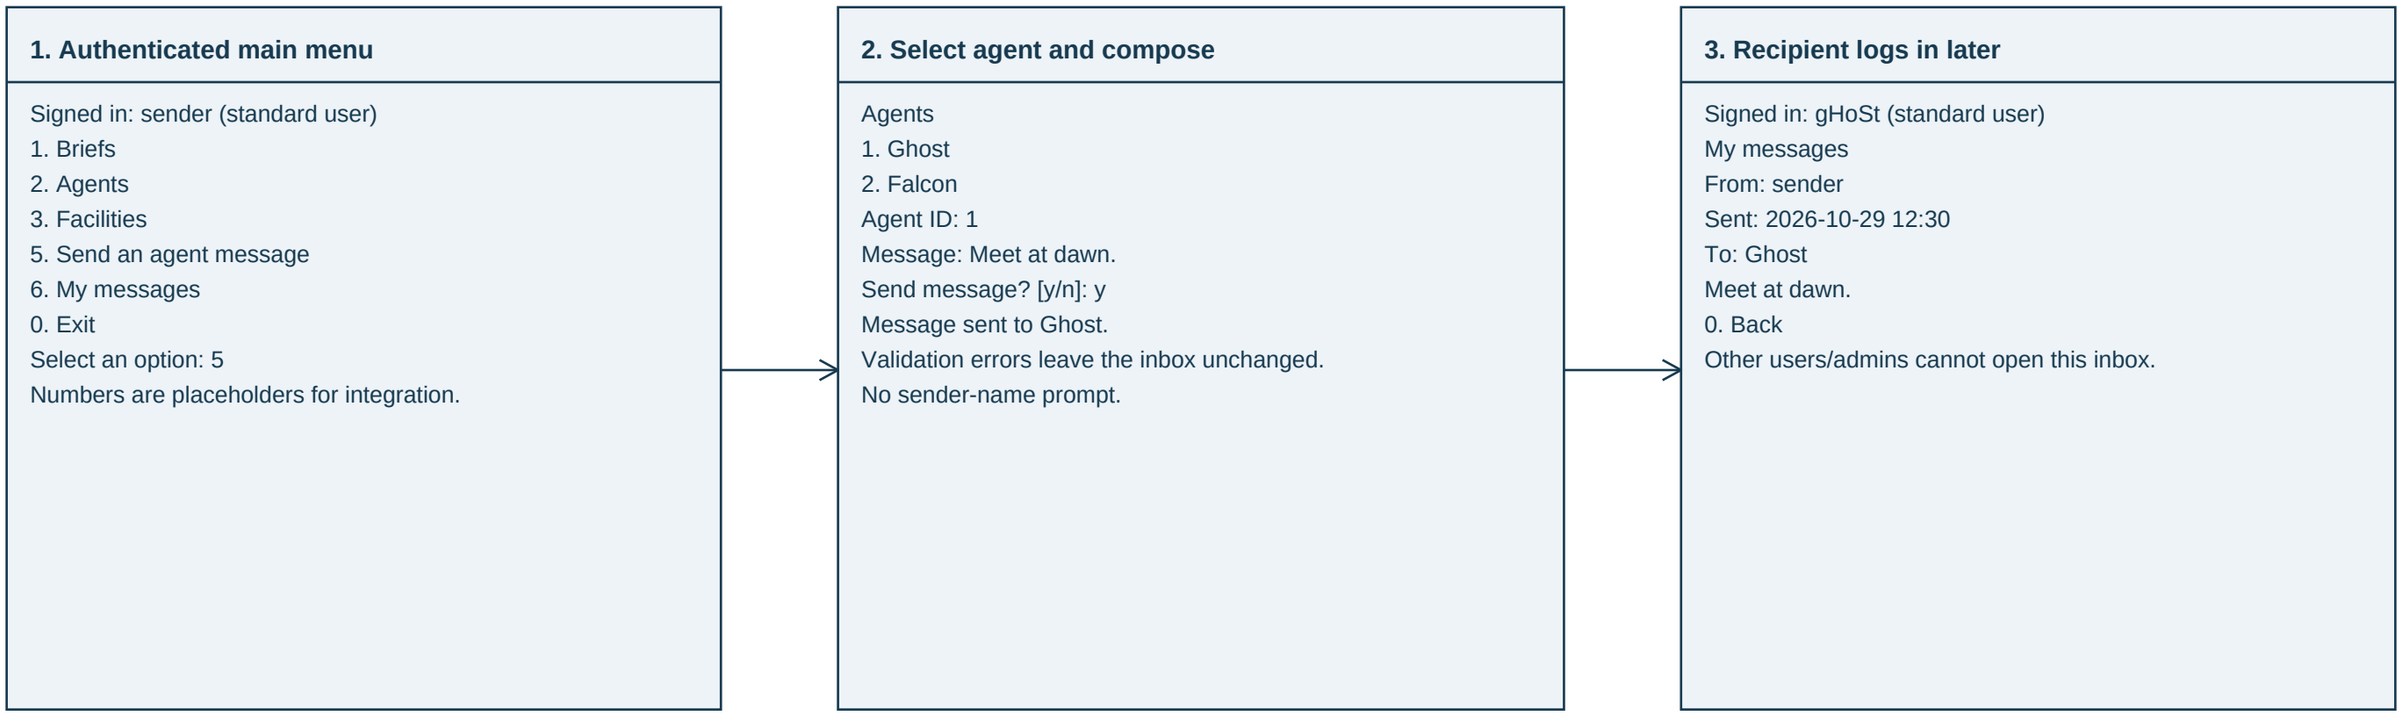
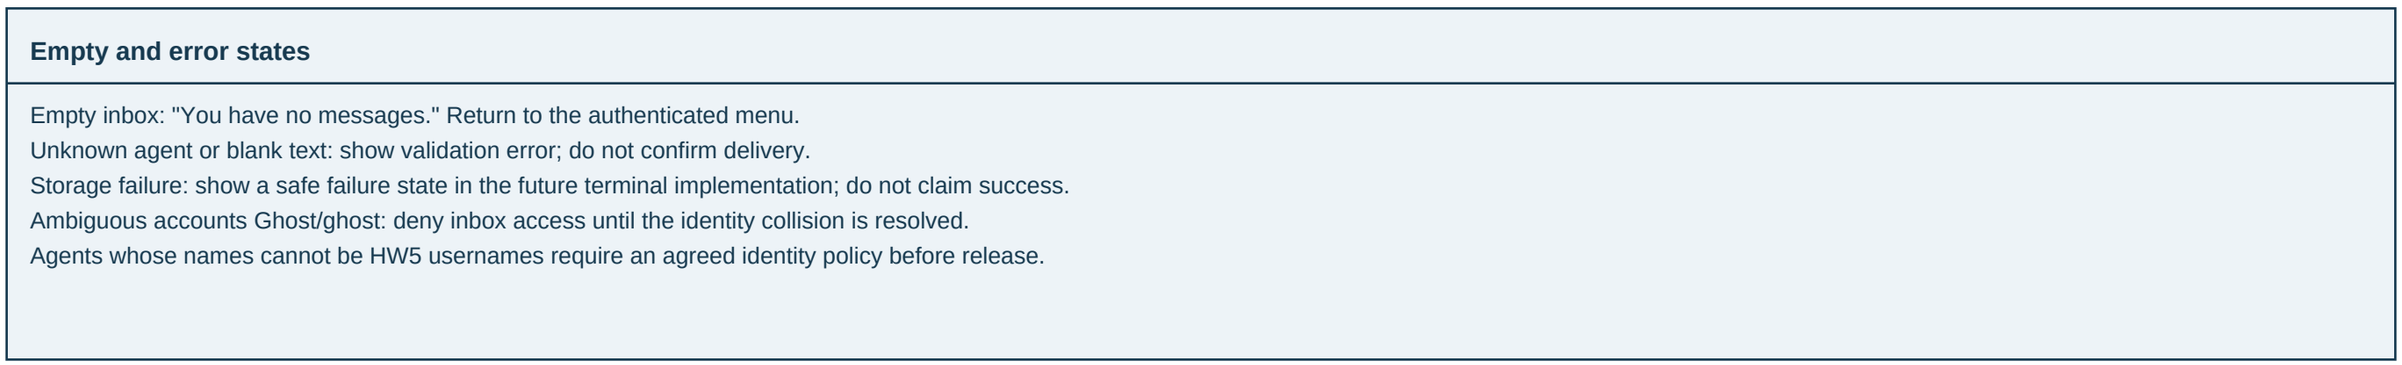
Terminal messaging - proposed interaction

Week 2 wireframe, not an implemented screen. Message identity always comes from the verified login session.





Read-only HTML - coordination wireframes

Proposal for Teams B/C to discuss. Plain HTML only; no CSS/JavaScript. Messages are terminal-only.

A. Login /

Top Secret
Username: [_____]
Password: [_____]
[Log in]
Invalid credentials: show error and keep login form.
Verified login issues browser-session cookie (no persistent expiry).

B. Authenticated navigation

Top Secret | Logged in: Ghost | Log out
[Briefs] [Agents] [Facilities] [Missions]*
[Audit log] (admin only)
* Mission navigation coordinated with the model/view owners.
No compose form or inbox link in this web release.

C. Protected list and detail pages

Agents
ID | Name | Facility
1 | Ghost | Test Agency
[Read]
Agent: Ghost
Date of birth: 1990-01-01
[Back to agents] [Home]
Use HTML tables/lists; reuse shared text content.

D. Protected audit history (admin)

Timestamp | User | Action | Content | Identifier
2026-10-29 12:30 | sender | READ | AGENT | 1
[Back to home]
Standard user: deny access; hiding the link is insufficient.
Every protected route requires a verified session.
Web startup requires existing accounts.
