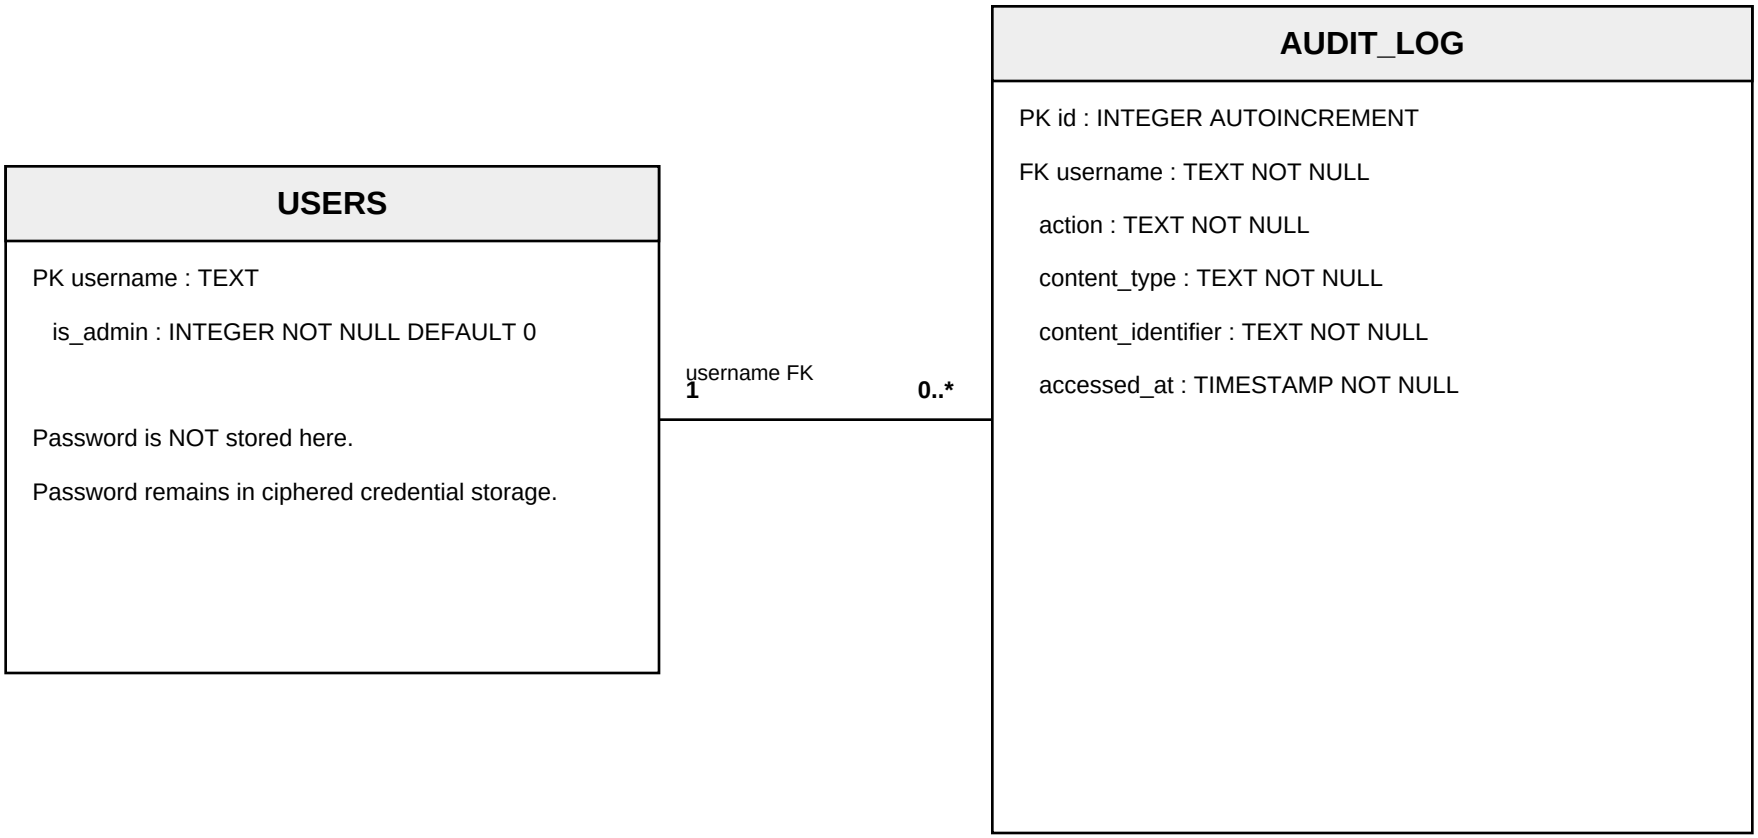
Homework 5 - Team D: User Accounts and Audit Log ERD

Week 1 database fragment for consolidation into the team-wide ERD



Ownership / coordination notes

Team D: user account creation/lookup, password coordination, audit log writes/reads.

Team A: admin/standard access-level rules and promotion/demotion behavior using USERS.is_admin.

Team C: should provide stable identifiers for briefs, agents, and facilities.

content_identifier is TEXT for Week 1 so audit logging is not coupled to one content table schema.

Planned actions: READ, CREATE, UPDATE, DELETE.
