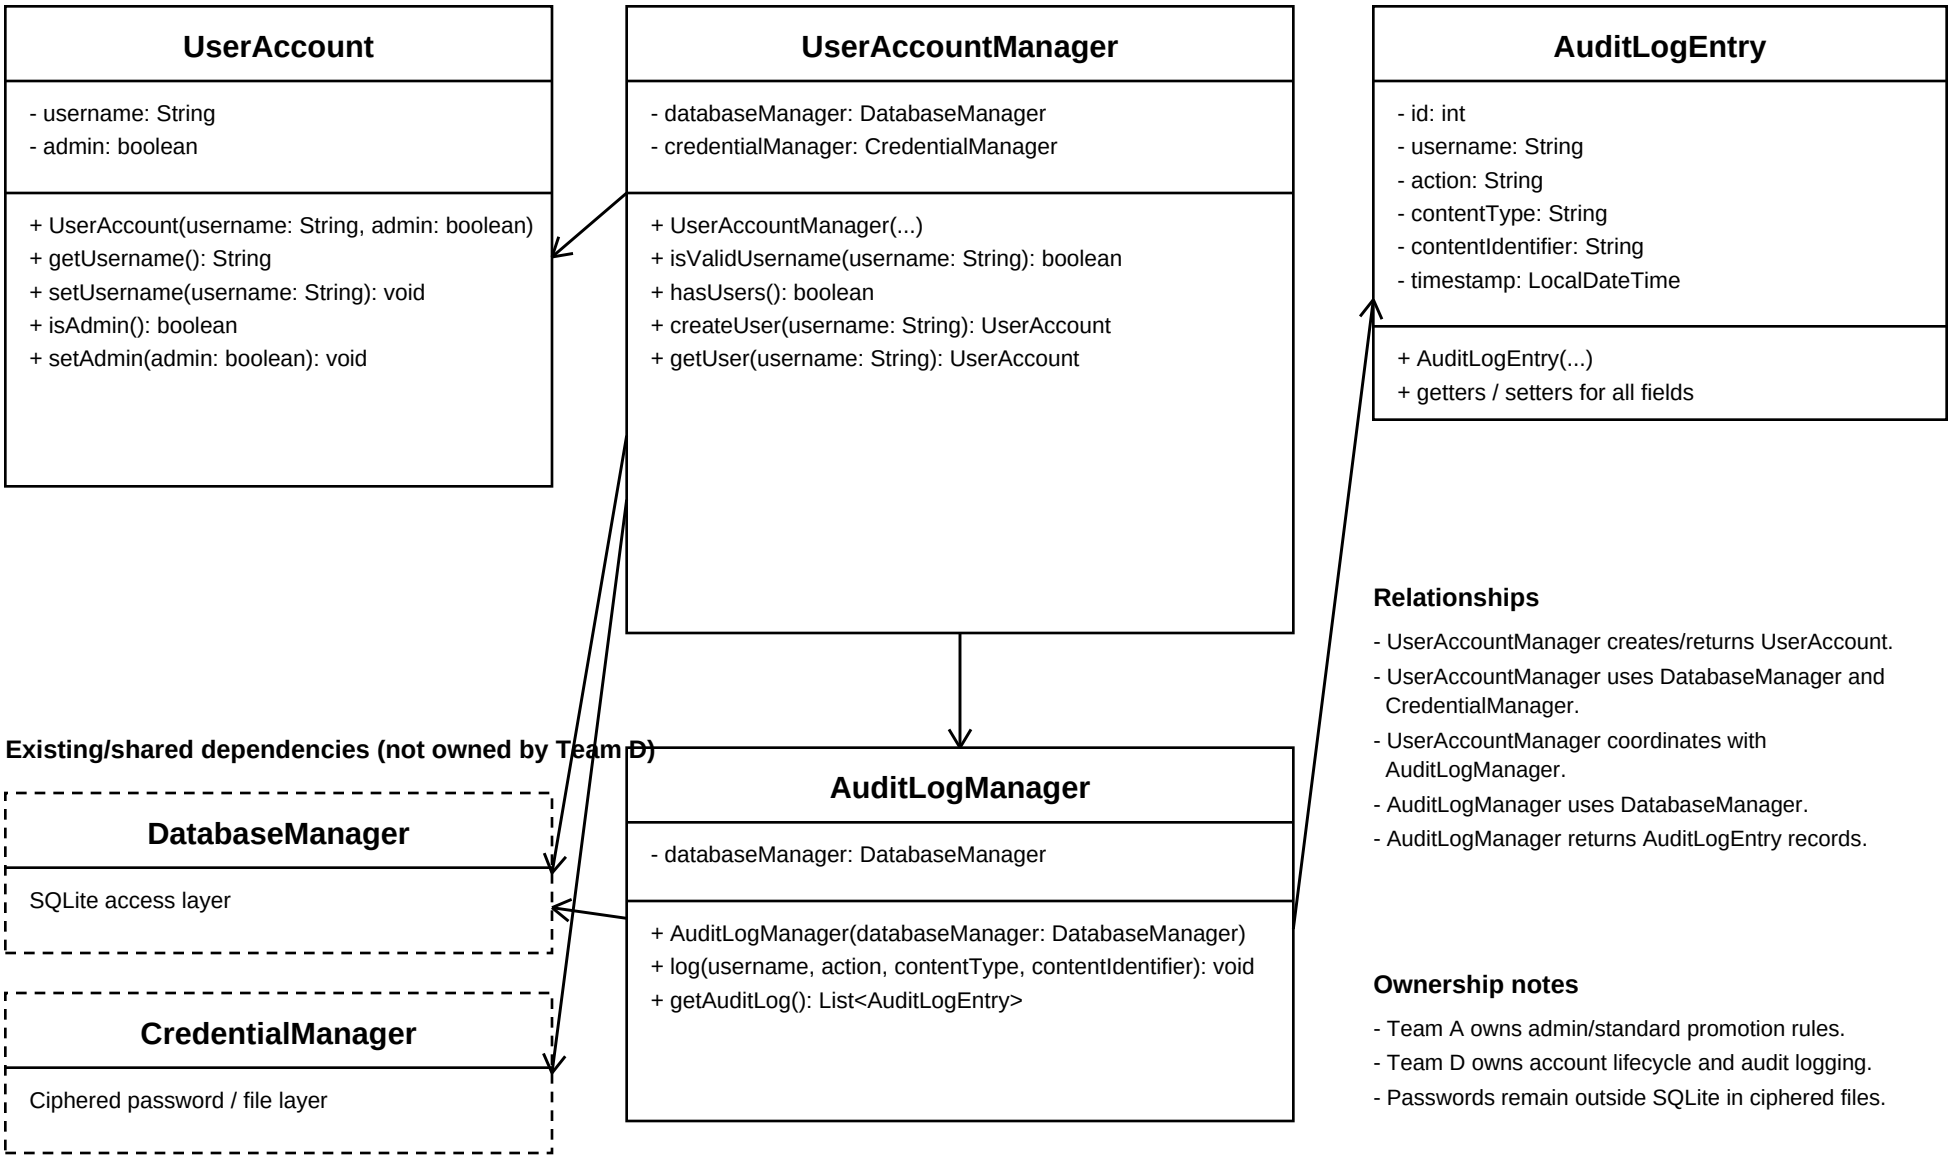
Homework 5 - Team D: User Accounts and Audit Log UML

Week 1 design fragment for consolidation into the team-wide class diagram



Relationships

- UserAccountManager creates/returns UserAccount.
- UserAccountManager uses DatabaseManager and CredentialManager.
- UserAccountManager coordinates with AuditLogManager.
- AuditLogManager uses DatabaseManager.
- AuditLogManager returns AuditLogEntry records.

Ownership notes

- Team A owns admin/standard promotion rules.
- Team D owns account lifecycle and audit logging.
- Passwords remain outside SQLite in ciphered files.
